Lumena New Materials Wins Three Honourable Awards

*Gaining recognition in corporate governance
Demonstrating strong leading position*

[9 December 2011, Hong Kong] **China Lumena New Materials Corp.** (“Lumena New Materials” or the “Company”, HKEx Stock Code: 67), the world’s largest PPS resin producer* and one of the largest thenardite producers**, is pleased to announce that, with its excellent corporate governance and great emphasis on developing environment-friendly products, the Company has recently obtained three honorable awards, including “Green China 2011 – Outstanding Enterprises in Environmental Protection” (綠色中國·傑出環境保護企業) by United Nations Environmental Program and five environmental protection associations in the Greater China, “Hong Kong Outstanding Enterprises 2011” by Economic Digest and “The Excellence of Listed Enterprise Awards 2011” by Capital Weekly.

Organised by United Nations Environment Programme and five environmental protection associations in the Greater China and co-organised by over ten environmental protection organizations from Mainland China, Hong Kong, Macau and Taiwan, “Green China 2011–Environmental Protection Achievement Awards” (綠色中國 2011·環保成就獎大型評選) ceremony was held in Hong Kong to honor governments, enterprises and individuals with excellent performance in terms of environmental protection. As the largest PPS resin producer in the world in terms of production capacity after the acquisition of Sino Polymer New Materials Co. Ltd, Lumena New Materials produces PPS fiber, which was widely used in filters and filter bags by thermal plants, cement plants, incinerators etc to reduce smokestack emission. Such products can substantially raise their standards in environmental protection in order to meet Chinese government’s new requirements. Therefore, the Company was awarded with “Green China – Outstanding Enterprises in Environmental Protection” (綠色中國·傑出環境保護企業). At the same time, since the Chinese government lists new materials as one of the major developing industries in China and implements medical reform, Lumena New Materials, as a leader in global special chemicals and new materials, closely follows the national policy and prioritises the development of PPS and medical thenardite. With its brilliant business performance and excellent corporate governance and strategies, the Company stood out from its competitors and was awarded the “Hong Kong Outstanding Enterprises 2011” by Economic Digest and “The Excellence of Listed Enterprise Awards 2011” by Capital Weekly.

Chairman and Executive Director, Mr. Zhang Zhigang said, “It’s our great honour to be awarded with these three representative prizes on environmental protection and corporate governance, which shows that our efforts are widely recognised by different environmental protection groups. The excellent enterprise awards also demonstrate our leading position in the industry. In the future, we will continue to grasp opportunities brought by the Twelfth Five-Year Plan, which prioritises environmental protection and new materials, and develop PPS business vigorously. In addition, we’ll actively work on R&D of new products and the expansion of production capacity through vertical integration of our business, strengthening our competitive edges and leading position in the industry.”

About China Lumena New Materials Corp.

As a leading new materials and chemical enterprise in China, Lumena New Materials is the world’s largest PPS resin producer* and one of the world’s leading thenardite producers**. PPS is a special engineering thermoplastic widely used in electrical and electronic, automotive, rail transportation, environmental protection and emissions reduction, aeronautics and astronautics, and coatings applications, etc. It has been listed as one of the new materials to be developed and supported by the China’s government in its 12th Five-Year Plan. The Company manufactures, develops and sells PPS resin, PPS compounds and PPS fibre. Equipped with the world’s largest single line production facility, the Company produces numbers of high quality thenardite products such as powder thenardite, specialty thenardite and medical thenardite. It operates four captive underground glauberite mines and is the only approved and certified producer of medical thenardite in China.

*In terms of production capacity as of December 31, 2010, according to SRI Consulting, a research service firm
